

DTR

Rev. 1/09-02-2009

DOUBLE BEAM SCREED BOARD VIBRATOR

Very useful for compacting concrete floors in stables, cycle paths, garden paths etc.

Description

Screed board vibrators DTR are especially suitable for concrete compacting (12 cm depth) and levelling. The machines can be supplied with different types of electric motors, a petrol engine or a diesel engine. All types are equipped with a special clamping system for holding beams of wood, steel or aluminium. (Note: beams are not supplied by Lievers Holland). The operating handle of DTR screeds is mounted on rubber vibration dampers. Furthermore, the electric DTR versions have a motor reversing switch for moving the machine forward and backward.

Characteristics

Main characteristics of DTR are:

- Different types of driving units available.
- Very user-friendly.
- Stiffness.

Technical information

PRODUCT NAME	FEEDING VIBR. MOTOR	VIBRATIONS	WEIGHT
		Per min.	KG
DTR 230	230V/50 Hz - 1 phase transformer	3000	35
DTR 400	400V/50 Hz - 1 phase transformer	3000	37
DTR 300	42V/200 Hz - 3 phases converter	6000	37
DTR B	Not applicable	3000	40

Diesel engines are available on request.
